Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

As the owner of a homebuilding business in southwest Kansas, I write to ask you to support AT&T's proposed acquisition of T-Mobile.

Specific to my business is the need to stay in constant contact with my employees out in the field. Given the rural nature of the area we work, the need to enhance mobile broadband is great, and the type of high-speed 4G LTE network that would be built out should this merger go through would make a huge difference for us.

But beyond our specific needs, this merger would be good for the rural communities we serve and rural communities across our country. People buying our homes want access to great schools, health care, and jobs, and the ability of this merger to promote technologies such as distance learning and telemedicine, and to spur economic investment in rural communities is huge.

This merger and the expanded high-speed mobile broadband network it will bring to rural Kansas has the potential to be truly transformational. Please consider these benefits as you review, and hopefully approve, this merger.

Sincerely,

A handwritten signature in black ink, appearing to read "Bob Hitz", with a stylized flourish at the end.

Bob Hitz, President  
Hitz Builders, Inc.
